

阀体

接口	螺纹规格
P-P1	G1/2
T-T1	G1/2
A1-A2	G3/8
B1-B2	G3/8
N	G1/2

Technical requirements:

1. Rated flow :40L/min, maximum flow :55L/min;
2. Maximum working pressure :25MPa;
3. Setting pressure of safety valve :18MPa;
4. Each movement part must be flexible, no stuck phenomenon;
5. Oil port size :P, T, N oil port are G1/2, Oil ports A and B are G3/8.
6. Valve body surface phosphating, safety valve and plug galvanized, the back cover of the support is aluminum.
